Fax: 212-336-2985

Julia Livingston is an Associate in the Firm's Litigation department. She represents clients in complex commercial litigation and employment matters. From 2017 to 2018, Ms. Livingston served as a law clerk to the Hon. John Michael Vazquez of the United States District Court for the District of New Jersey.

Representative Matters

Representing a major pharmaceutical company in an antitrust litigation brought by a competitor alleging exclusionary contracts and bundling. Also defending the client in follow-on consumer class action lawsuits.

Representing medical device manufacturer in an ongoing contract dispute with a counterparty.

Represents and advises non-profit clients on a wide range of employment matters.

Pro Bono

Ms. Livingston also maintains a robust pro bono practice. Before joining the firm, she was a fellow at Her Justice, a non-profit that provides legal services to women and their families in New York City.

Data Security Law Blog

DataSecurityLaw.com is the firm's resource for the latest news, analysis, and thought leadership in the critical area of privacy and cybersecurity law. Patterson Belknap's Privacy and Data Security practice provides public and private enterprises, their leadership teams and boards with comprehensive services in this critical area. Our team of experienced litigators, corporate advisors and former federal and state prosecutors advises on a broad range of privacy and data protection matters including cyber preparedness and compliance, data breach response, special board and committee representation, internal investigations, and litigation.

New York SHIELD Act in Full Effect During COVID-19 Crisis

April 24, 2020

On March 21, 2020—just as the COVID-19 crisis began upending our way of life—New York State's Stop Hacks and Improve Electronic Data Security (SHIELD) Act went into effect fully. The SHIELD Act, which amends New York's 2005 breach notification law...

CCPA Update: Key Proposed Regulations on Verification of Requests & Non-Discrimination

December 20, 2019

On January 1, 2020, the California Consumer Privacy Act (CCPA) becomes operative. As we reported last month, the California Attorney General (AG) released long-awaited draft regulations to the CCPA. This is the third installment in a series of posts discussing...

Amendments to the California Consumer Privacy Act: Six Clarifications

September 24, 2019

As readers of the Data Security Blog will know, the California Consumer Privacy Act ("CCPA") becomes operative on January 1, 2020. The CCPA is the most sweeping consumer privacy law in the United States, covering most for-profit businesses that do...

An Old Hack Comes Back to Haunt (Newly-Public) Slack

July 24, 2019

Last Thursday, Slack Technologies, Inc. (Slack) announced that it would reset passwords for a number of accounts compromised by a security breach that occurred more than four years ago, in March 2015. Slack—a fast-growing messaging service that launched in 2014...

Amazon Sellers Hit With Phishing Scheme

May 21, 2019

Hackers have managed to break into the accounts of 100 sellers at Amazon.com. The hackers funneled money from the seller's accounts—either from sales or loans—into their own bank accounts after stealing seller credentials. It is not clear how much money was...

Are Bug Bounty Programs Worth It?

March 13, 2019

Almost weekly, it seems there is another news article about a bug bounty program sponsored by a major corporation where an amateur hacker – often a teenager – is paid a sizeable sum of money for finding a bug in...
